

Schizophrenia Research
Foundation (India)

Annual Report
2021-2022

Brand Values

*W*e have been fine tuning our processes and the client touch points to deliver in full the brand values of Commitment, Human Care, Professionalism and Quest for Knowledge, to live up to the promise of excellence in mental health care and research.

The Schizophrenia Research Foundation (SCARF) was founded in 1984 with the primary objective of providing quality care and rehabilitation to those suffering from severe mental disorders. Towards this, we have established an out-patient department, day care centre offering medical consultations and rehabilitation services. Three in-patient facilities at the Mental Health Centre, Anna Nagar, Thiruverkadu and Mahabalipuram. Community based treatment programmes in rural and urban areas and teleconsultations are pioneering projects from SCARF.

Research into several aspects of mental health has made a huge contribution to global research in the field of schizophrenia and allied conditions. Our researchers are much sought after for international and national collaborations. SCARF continues to be designated as the Collaborating Centre of the World Health Organization for Mental Health Research and Training. Our biennial conference ICONS draws response from distinguished researchers from all over the world. SCARF also trains a number of students of psychology, social work, nursing and occupational therapy and is affiliated to the Dr.MGR Medical University for PhD studies in mental health.

Promoting mental health awareness and lobbying for the benefits for the mentally ill is an on-going activity that has paved the way for changing public attitudes to persons with mental illness. Educational materials for increasing mental health awareness and more recently a focus on mental health literacy which fosters wider construct of help-seeking efficacy. The film festival Frame of Mind is an important strategy to achieve awareness and deal with stigma. The SCARF Media Award initiated for journalists writing on mental health is a popular event every year.

SCARF's training programs are widely sought, especially popular for internships across all categories of mental health professionals. Notable amongst these is the year long diploma course in mental health care and counseling. With the COVID pandemic that lasted over two years, virtual training programs have become an important choice of training delivery.

A loss that has left a vacuum

Dr Sarada Menon passed away on 5th December 2021- a big loss to SCARF and the field of Psychiatry as a whole. Condolences were received from the medical fraternity from India and abroad. Prayer meetings were held at Anna Nagar and at the residential facilities as well. A public meeting was held on 18th December 2021 at SGS Sabha as a tribute to the departed soul.

Dr. Sarada Menon, M.D, FRCPsych (UK) was the first woman psychiatrist in India whose name was synonymous with psychosocial rehabilitation for which she had great passion.

After obtaining her DPM from NIMHANS, Bangalore in 1961, she became the Superintendent of the state run Madras Mental Hospital (now known as Institute of Mental Health) and this heralded an era of reforms with a focus psychosocial rehabilitation. The hospital which only served as a custodial place was slowly turned into a mental health center through many far reaching reforms initiated by her. She saw with great foresight, that interactions among social workers, the patients family and the patient was the key to the patients recovery. Therefore she took the step of appointing for the first time professional social workers, started outpatient services, initiated an Industrial therapy/ vocational centre where patients could be engaged.

Dr.Menon was also responsible for starting post graduate courses in psychiatry . She convinced the Government to establish psychiatric clinics in all the head quarters hospitals of every district in Tamil Nadu. In 1984, she founded SCARF along with Dr Rajkumar and Dr Thara with the objectives of rehabilitation, research and promoting awareness on mental health. Today, SCARF is a highly reputed centre nationally and internationally in many facets of work on mental health.

Right from her early years, she displayed a great penchant for teaching and even now her students many of whom have distinguished themselves in their own right recall with great appreciation her clinical acumen and clarity and enthusiasm in teaching. She has inspired several bright young people to take up this discipline of psychiatry. She has naturally served as examiner in almost all universities in the country and has also guided several PhD scholars. Her desire to serve the community propelled her to work for the

Red Cross, and many other charitable organizations and other NGOs.

Dr. Menon's contribution to psychiatric rehabilitation won her wide acclaim all over the world. She was the regional vice-president and also the Secretary General of the World Association for Psychosocial Rehabilitation. She was the founder of the Indian Chapter of WAPR.

Many awards came her way, the most notable being the Padma Bhushan in 1993, one of the highest civilian awards given by the government of India. She was indeed a highly modest, humble, cheerful and compassionate person. Almost everybody who had crossed her path were struck by her ability to connect not just with them, but with their issues in life and their families. She was an universal mother.

We were indeed fortunate to have her among our midst for almost a century and became better human beings ourselves by imbibing many of her sterling qualities.

As Long fellow penned ' Lives of great (wo) men all remind us, we can make our lives sublime and departing leave behind us footprints on the sand of time" .

Shri Keshav Desiraju

An Indian bureaucrat, he had served as the union health secretary of the country. Desiraju retired as the Union Secretary in the Department of Consumer Affairs and held several other positions in the Government of India, as well as other state governments. He was a scholar and researcher and an advocate of prioritising mental health. Even after retirement, the IAS officer continued to serve in advisory boards of several organisations and contributed towards improving public health. He was known for his contributions to mental health and community healthcare, and was the architect of the country's Mental Healthcare Act of 2017. SCARF was very fortunate to have him as a member on the Board of Management. His astute observations helped resolve many challenges in the running of the organization. He was a thoughtful advisor, who offered practical, doable suggestions that went a long way in steering us into action.

**Shri A. Damodaran**

Another huge loss was the death of Shri A. Damodaran. A family care provider for two of his close relatives, he was always, during the three decades that we have known him, a man who was a strong pillar for his family. He worked hard to take care of them. For years he would be talking about doing something substantial for SCARF. Around 6 years ago, he said that he would like to leave his property to SCARF to do as we thought fit. He followed this up by his insistence that we establish a program there during his life time. On that piece of land stands the Dementia inpatient center. A noble gesture from a person whose was committed to supporting the cause of persons with mental illness.

Dr R.Thara,
Co-Founder and Vice Chairman, SCARF

Annual General Body Meeting, 30th June 2022

Secretary's Report for the year April 2021– March 2022

I take pleasure in submitting the annual report on active year of work and progress at SCARF. Despite the many challenges posed by the COVID Pandemic, our services have remained uninterrupted as have been activities such as rehabilitation, training, awareness or community outreach.

Several highlights brought cheer during the years of the COVID Pandemic that brought grief in its wake across the globe.

- The first major event of the year was the **International Conference on Schizophrenia IConS IX Edition, held virtually** on 24th and 31st July 2021, after having been postponed in 2020 due to the lockdowns. The theme of the conference was **Physical Health and Schizophrenia**. In a condensed virtual format, this conference had three renowned speakers from India and abroad, delivering plenary talks on their research pertaining to schizophrenia.

The third Dr Sarada Menon oration was delivered by an eminent speaker from Australia, Dr Frances Dark. This conference, as is the practice, was a platform for young researchers and delegates who put up posters. The good numbers of participation from within India and outside the country was encouraging.

- SCARF was established in the year 1984. It has been a journey that has seen a lot of action over the decades. The journey has been marked with a lots of events that contributed to the service of a vulnerable section of the population, persons with serious mental illnesses. Several significant collaborations through the years have led to important scientific discoveries that have been improved care of this population. *The story needed to be chronicled – this story is presented in the **SCARF Book – Caring for the Mind- a journey of 35 years and counting....***

- The in-patient facility, the **T.S. Santhanam Center and the Sundaram Fasteners center for Dementia Research** was inaugurated this year on September 21st, 2021, by Dr Soumya Swaminathan. This 20-bed facility is exclusive for dementia care. The centre has state of art facilities, and is to our knowledge, the first such facility to use “dementia-friendly” design in India. This will bridge an important gap in the service provision for persons with dementia in Chennai.

We are very proud to share that Dr Thara, Vice President, was awarded the Nari Shakti Puraskar in March 2022 by the Government of India. This annual award given by the Ministry of Women and Child Development of the Government of India to individual women or to institutions that work towards the cause of women empowerment. This is indeed a huge recognition, not only for Dr Thara, but for the cause of mental health in the country as well. Amongst several bodies which recognised this award given to Dr Thara, the Indian Psychiatric Society at their annual meet felicitated Dr Thara for the award.

CLINICAL SERVICES

It is a very heartening to report that clinical services at SCARF continued through the year uninterrupted, with the numbers gradually increasing to the pre-pandemic status. We continue to deliver clinical consultations through phone, video-conferencing or email .contact. Many families are utilising this service as the demand is rising. We have also introduced teleconsultation and a courier service to deliver medication to patients this year. This allows us to reach more patients.

• **Out Patient Services**

The out patient services consultations and rehabilitation services continue to provide to a large number of patients through the year. The uninterrupted services by a dedicated team of clinical and administrative staff has helped provide quality care to a large vulnerable population. We ensured that all COVID safety precautions remained in place through the year, including surveillance for history of

COVID, temperature checks, a watchful eye for masks, public education on masking and hand washing. Patient and staff protection was top priority at all times.

• **Residential Care Program**

SCARF'S residential care facilities, across three geographically distinct centers, with a total capacity of 154 beds, has been offering the much needed in-patient service to patients in crisis, over several decades. Although the pandemic in 2020-2021 forced a drop in the numbers of patients admitted, the services have gradually returned to full capacity over the past year. A committed team of staff has been providing care at all the centres. Evidence based care practices form the cornerstone of the standard operating procedures. The services are offered at affordable costs.

SCARF In-Patient admissions

(April 2021 - March 2022)					
		BB	BMMSSK	SMC	Total
1	No. of patients who have utilized service	181	108	117	406
2	No. of Life Time patients	8	6	2	16
3	No. of Long stay patients (more than 6 months)	123	75	25	223
4	Percentage of beds occupied by Life Time patients	4 %	6 %	2 %	4 %
5	Percentage of beds occupied by Long Stay patients	68%	69%	21%	55%
6	No. of new admissions	63	38	114	215
7	Average usage of bed per quarter	2.5	2.3	2.9	2.7

• Psychosocial Rehabilitation:

A key objective of SCARF since inception, we continue to offer psychosocial interventions as an integral part of management. An individually tailored needs based plan set to deliver evidence based interventions forms the fundamental approach. A team of psychologists, social workers and occupational therapist deliver the interventions. This year also saw the implementation of interventions virtually. In a study that sought an answer to the question, "Does Telephone Based Intervention Combined with Face to Face Contact Improve Socio-Occupational Functioning of Persons with Schizophrenia?", we found that regular telephone contact was as effective as face to face, to improve socio-occupational function. Thus, for many patients and families, it may suffice to be in periodic contact with the psychiatrist/rehab therapist, with intermittent visits to remain adequately functional. This research was published in a peer-reviewed high impact, indexed journal - Journal of psychosocial rehabilitation and mental Health

Several important patient centric activities marked the departmental activities this year.

1. We initiated a conversation about **Insurance for persons with mental illness**

amongst various stake holders given the context of Mental health care Act (2017) which is explicit on the role of Insurance coverage for chronic mental health problems. In order to create advocacy amongst patients and their families, several steps were taken through this year.

- Meetings with other organisations in the country, including NIMHANS paved the way for an understanding of the current the current situation regarding the insurance coverage for mentally ill. These discussions also helped plan advocacy to strengthen the process to avail insurance for mental illness.
- A mixed method study to understand the mental health care expenditure and access to healthcare insurance policy among patients with mental illness and their families, was initiated This survey is on-going. We are also exploring patient and family needs for insurance through in-depth interviews. This data will be presented to the policy makers and insurance companies to promote action in this foeld
- We are also working with Health and Disability departments in the state government to create a unified database

on official identity documents that are necessary for any insurance applications

2. Interventions aimed at addressing a variety of patient outcomes like cognition and physical health

- **Compensatory Cognitive Training (CCT)** is a strategic cognitive remediation program developed by Dr. Elizabeth Twamley at United States. CCT when compared to other existing cognitive interventions is economical and non-computerised and above all involves teaching compensatory strategies that can be used in real life situations which coincides with the needs of the patients. The program was adapted to suit the Indian culture. This cultural adaptation was published in a peer-reviewed indexed journal, Journal of psychosocial rehabilitation and mental Health . We are now testing the feasibility of delivering CCT as a virtual one to one intervention
- **Course on Psychosocial rehabilitation:** This 30 hours 3 week training program for post graduate students of social work, counselling and psychology aims to provide a platform for a clear practical understanding of recovery and from chronic mental illness and evidence based psychosocial intervention. The course which began pre-pandemic, gained ground during the years of COVID as a virtual program. Initial courses held at the Madras School of social work drew attention that resulted in repeat courses in the current year. We were also invited by the Women's Christian College to deliver the same program. We undertook this in the months of December 2021-January 2022. The course has been well received and has a great potential for continuation and expansion to other colleges.
- **Virtual Do- along Physical activity program for people with mental illness.** To promote the general well being of the

individual through physical activities the department of PSR has designed a do-along virtual group workout schedule for the patients. The virtual online program has been developed for engaging patients in physical activity keeping in mind the social norms of the COVID -19 pandemic.

3. Peer Support

Peer support for persons with serious mental illness has been gaining interest in recent times. It means that persons who have recovered from the illness to help other individuals who in the recovery process. Studies have focused on the importance, effectiveness and models of implementation in peer support. It has the potential to drive through recovery-focused changes in services which can transform both individuals and systems. Emphasis of peer support lies on the importance of personal interests and strengths as foundations to recovery, rather than psychopathology and treatment. People with serious mental illness report benefits from interacting with peers bringing in a sense of connectedness, feelings of group belonging and positive.

In an investigation at SCARF, to find out whether peer support is acceptable in our population, we undertook a survey of patients, families and mental health professionals on what they thought about the subject. We found that more than 80% of those surveyed thought that peer support would work. The patients and families preferred same gender peers and those who spoke the same language. They were willing to share personal information They felt that this would enhance their mental health and day to day living with an emphasis on independent living and interpersonal and social relationships and help them achieve medication and treatment-related goals towards recovery.

This research has been accepted for publication in Frontiers in Psychiatry, section Schizophrenia.

Youth Mental Health

Over the years, thanks to a research grant from NIH, and collaboration with Douglas Hopsital Canada, a long running early psychoses project set the platform for foraying into **youth mental health services (YMH)** at SCARF. This was the result of other collaborations that was established, particularly with University of Warwick, UK.

- **Clinical care** to children and adolescents is integrated into the clinical services at Anna Nagar, SCARF. This service offers consultations, medical treatments, psychological and psychosocial interventions for young people with anxiety, depression, and more serious mental health conditions like psychoses. A dedicated team of staff are involved in delivering this service. This year has seen a burgeoning numbers of young persons accessing the facility.

Evidence across the globe indicates the value of non-clinical service framework that has been found to have a critical impact for young persons. Adopting The OF/BY/FOR approach, the YMH team started the rYMs, a peer support program where young peer volunteers were trained to deal with problems of the youth. This on-going program offers social interventions in a non-clinical space, with the aim of promoting mental health, prevention, early identification and referral.

- **Research:** In keeping with global research, the YMH research agenda focusses on resilience, and well being, with the key characteristics of youth centric, youth-propelled, inclusive research. There is a huge emphasis on using co-design methods. Arts based interventions are rapidly being tested for effectiveness as part of the research projects. The target groups are from schools and colleges and include youth in open communities as well. Use of technology – more specifically app based interventions are central to the program.

- **Training:** We have been conducting regular training programs for various stakeholders working with youth or organizations with

youth population. At the same time, we have also arranged and delivered training programs for the staff of YMH program so that such skills can be used by them in delivering better clinical care for young people seeking help with SCARF. We have planned to continue this trend of regular trainings and updating our skills to better disseminate youth mental health in the communities and build a state-of-the-art youth mental health service at SCARF.

- **Workplace mental health** is also being given attention. A 6-session training workshop has been initiated and running successfully at a finance-based start-up, Initium Partners LLP, as a part of the Workplace Wellness Enhancement (WWE) program, over 3 months. The training program focussed on catering to the organization's needs of improving communication, workplace relations, resilience and wellbeing of the employees in the firm. The training program has been formulated to deliver the module in an interactive and engaging fashion, palatable to the youth of the community. The program targets to deliver basic mental health literacy and positive psychology, at workplaces, as a means to alleviate stigma and improve help-seeking amidst the youth.

- **Outreach programs*** As a part of community outreach from YMH, Dr Vijaya Raghavan is working with the youth from the rural and disadvantaged communities in Chengalpattu district to provide basics of mental health and make them leaders in their communities to provide the early mental health to the young people from their communities. The trainings are conducted as group sessions in a youth safe space where the young people can voice their thoughts and ideas without discrimination and judgement. In this youth safe space, interventions to improve youth mental health are taken as a collective discussing the various challenges and opportunities in improving youth mental health.

*The safe space is an integral part of SCARF'S **Juveniles Accessing Mental Health Services (JAMS)**. This is a research project with

adolescents in juvenile homes. The two year project commenced in April 2021 and is funded by Grand Challenges Canada. The focus of this project is multi-dimensional. It addresses the acceptability and feasibility of creating a Youth Friendly Space to deliver mental health literacy within the confines of a Juvenile Justice system (JJS) residential facility, to the young adolescents, the families and administration of the JJS. This project is currently underway in two cities- Chennai in Tamilnadu and Behrampur in Odisha

* We are also reaching out to colleges and schools to create peer support volunteers who will be contact points for other young persons in the institution in the city. This is a follow up of our experience with similar work done with students at KREA University, which is in its second year of operation. The peer volunteers are trained to listen and understand any emotional issues that may arise with student in the institution. They are bearers of social network who form support groups for the youth in the institution. They are also trained to deliver first aid support intervention and to refer appropriately.

Dementia Services

Dementia services have increased in volume significantly increased since inception in 2015. The past year has seen a tremendous increase in the use of virtual consultations. The service aims at providing clinical and support services for persons with dementia and their families. It offers a comprehensive assessment and personalised care plans, a day-care centre, and an inpatient service. Apart from this, it runs community outreach activities in villages and in the city of Chennai. DEMCARES also

runs training programs for various categories of care providers and has recently signed an MOU with the Govt. of Tamil Nadu to provide training to health care professionals under the National Health Mission (NHM).

Over this year, the department has provided a large number of consultations to elderly persons. The team has been making extensive, it use of videoconsultation platforms for providing consultations and interventions as well.

S.No	Number of patients	April 2021– March 2022
1	New patients through telemedicine	152
	Males	63
	Females	89
2	Review through telemedicine	927
	Males	433
	Females	494
3	New' patients in person	199
	Males	94
	Females	105
4	Review patients in person	478
	Males	199
	Females	219
5	Average no of Consultations per day (Consultants)	5

In addition to clinical work, the team is also actively involved in public awareness through talks, and active participation in webinars

and conferences. The research work from this department is widely published in several peer-reviewed high impact journals.

COMMUNITY OUTREACH

SCARF is reputed for its community mental health programs, established over three decades ago. However, owing to the pandemic – the outreach services in Pudukkottai, Thirumala Charities and other sites like the Temple of Service in Chetput slowed down. Where convenient on-line clinical consultations were operated. In addition, mobilization of government welfare services, was facilitated and is being actively followed up. Active collaboration with local social service organisations enabled the distribution of COVID relief materials for our patients, especially those in remote villages and those who lost their jobs during the pandemic.

Collaboration with the TN Women's Development Corporation: The training program has been progressing well. The TN Govt is now giving their SHG members a special allowance for mental health out-reach.

Efforts are on to get health insurance from the Government for persons with mental illness through the State Mental Health Authority – (SMHA). Mr Kotteeswara Rao, a senior staff from SCARF is a member of the SMHA.

RESEARCH

SCARF's research activities are widely acknowledged globally. In keeping with the trends over the years, we have been actively engaged with funded collaborative international and national studies. Notable amongst these are the Collaborative Programme of International Research on Psychoses in Diverse Settings (INTREPID II) and the Improving outcomes for people with psychosis in Pakistan and India – enhancing

the Effectiveness of Community-based care (PIECES). The study - NIHR Global Health Research Group on Psychosis Outcomes: the Warwick-India-Canada {WIC} Network at University of Warwick has recently been completed. Several non-funded projects and 2 PhD Research are on-going. Publications from all our studies add to the world wide knowledge in the field.

	April 2021- March 2022
FUNDED RESEARCH PROJECTS – No. Ongoing	18 These include international collaborative studies, ICMR and DST funded projects. All projects are on-going
Intramural research projects	4 ongoing
Student (DNB Research)	Three projects – two completed, one project - underway currently
Publications in peer reviewed journals	12

TRAINING

- **Course on Psychosocial rehaibilitation:**

This 30 hours 3 week training program for post graduate students of social work, counselling and psychology aims to provide a platform for a clear practical understanding of recovery and from chronic mental illness and evidence based psychosocial intervention. The course which began pre-pandemic, gained ground during the years of COVID as a virtual program. Initial courses held at the Madras School of social work drew attention that resulted in repeat courses in the current year. We were also invited by the Women's Christian Colleg to deliver the same program. We undertook this in the months of December 2021-January 2022.

The course has been well received and has a great potential for continuation and expansion to other colleges.

- Diploma in National Board – Currently, we have three students
- Diploma in Mental Health care and counselling – One year program. Current batch has 8 students (July 2021 to June 2022). Three of the 4 modules has been completed in March 2022
- MOU signed with GRT Nursing College, Thiruthani for 8 weeks. It is a value added course on Psychological First Aid and Basic Counselling skills. Started September 2021
- Essence Media Course – For journalists running successfully for the past 2 years. Current batch 25 students have enrolled
- Training Placement for students of Social work, Psychology has gradually increased

MEDIA & AWARENESS

This year showcased several important activities with respect to public awareness. The pandemic meant that much of the programs went virtual. This actually allowed us to reach a wider audience. Webinars, panel discussions, articles in print formed the key elements of

the actions. While departments like youth mental health, community mental health and dementia services had focussed involvement in undertaking awareness programs, the media and awareness department took to addressing more general mental health issues, specially covering stigma and discrimination.

The 9th Edition of the **SCARF Media for mental health award** function was held

virtually on March 4th.

Dr Jaya Shreedar and Mr Venkatesh R (Chairpersons of Media Awards) chose the winning articles and Dr Girija Vaidyanathan, Former Chief Secretary, Government of Tamil Nadu announced the prize winners. It was announced that a new category of awards for writings based on lived experiences of non-journalists will be included from the next edition onwards. The awardees spoke about their experiences while writing their stories and were appreciative of the recognition.

The prize winners were from across the country. The English language prizes were awarded to First Place - Ridhhi Dastidar – India Spend, Second Place- Sudipta Das – Feminism in India and Third Place- VinodKumar Menon – Middy

Sindhuvasini – BBC Hindi and Sijo Pynadath – Deepika Malayalam Daily, won the first and the second places in the regional language sections. There was a special mention of submissions by Sudiksha Jain – Margika and Ayushi Khemka - The Health Collective India. A number of programs on dealing with the

mental health impact of Covid were held through the year.. Use of poetry and decoding digital mental health ecosystem: Opportunities for mobile health innovators and robotics were specific themes during the year and were led by Dr Sridhar and Mr D Kotteswara rao. Dr Mangala presented on “Mental Health literacy through the movies – The “Frame of Mind”” for the MeHelp Conference. She also led the film festival at a regional conference.

ADMINISTRATION

The department has ably taken care of all compliances pertaining to various licences need to run the organisation. The periodic inspection of the safety precautions is undertaken internally. It is conducted twice in a year. The reports of the safety inspections were reviewed. All the fire and electrical safety measures (Alarms/Extinguishers) were in place and monitored, Training on fire safety measure and evacuation plan was done at periodic intervals.

FINANCE

We are delighted that the renewals for the tax exemptions under 35 (1) (II) and under 80 G of IT Act have been received.

Appointments & Resignations

Several Research Assistants have been appointed during this financial year. The year saw the retirement of Mr K Chithiraikani, a long standing staff, who had diligently served in the capacity of Head, vocational training unit. Several staff had resigned for moving to better opportunities.

Dr. R. Padmavati

The Members of Schizophrenia Research Foundation (India) Chennai

Opinion

We have audited the financial statements of **Schizophrenia Research Foundation (India)**, which comprise the Balance Sheet as at 31st March 2022, the Statement of Income and Expenditure for the year ended 31st March 2022, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements of the entity are prepared in all material respects, in accordance with the accounting principles generally accepted in India and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Society as at 31st March, 2022, and its Excess of income over Expenditure for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) issued by the Institute of Chartered Accountants of India. Our responsibilities under those Standards are further described in the Auditors' Responsibilities for the audit of financial statements section of our report. We are independent of the entity in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India and we have fulfilled our ethical responsibilities in accordance with the Code of Ethics. We believe that the audit evidence that we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of the Management and those charged with Governance for the financial statements

Management is responsible for the preparation of the financial statements in accordance with the Limited Liability Partnership Act and other applicable accounting standards and policies generally accepted in India and for internal controls as Management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, Management is responsible for assessing the entity's ability to continue as a going concern, considering as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the entity or to cease operations, or has no realistic alternative to do so.

Those charged with governance are responsible for overseeing the entity's financial reporting process.

Auditors' responsibility for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain and audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Society's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Society to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all rela-

tionships to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
2. In our opinion, proper books of account as required by law have been kept by the Society so far as it appears from our examination of those books;
3. The Balance Sheet, the Statement of Income and Expenditure dealt with by this Report are in agreement with the books of account.

Vice Chairman

NOTES**SCHIZOPHRENIA RESEARCH FOUNDATION (INDIA)****NOTES FORMING PART OF FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2022****1. Organization Background**

Schizophrenia Research Foundation (India) ("the Society") is registered under the Tamil Nadu Societies Registration Act, 1975 bearing Registration S.No.24 of 1984. The object of the Society is the treatment & rehabilitation of the mentally ill, Research, teaching & Training, Public awareness to remove the stigma of mental illness, Community mental health.

The Society is also registered under section 12AA of the Income tax Act, 1961. ("The Act') The Society has obtained the exemption under section 35(1)(ii) of the Act for donations received for carrying out scientific research and under section 80G of the Act for the general donations received.

The Society is also registered under the Foreign Contribution Regulation Act, with Registration No.075900399 and the same is valid up to 1st January, 2027

Significant Accounting Policies**a) Basis of Accounting**

The society generally follows mercantile system of accounting except for the funds received to implement projects which are accounted on receipt basis.

b) Use of Estimates

The preparation of the financial statements in conformity with generally accepted accounting principles requires the Management to make estimates and assumptions in order to arrive at the reported amounts of assets and liabilities and the reported income and expenditure during the year. The Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Future results could differ from these estimates and the differences between the actuals and the estimates are recognized in the periods in which the actual amounts are known/materialize.

c) Building Fund

Contributions received specifically for Construction of Buildings are Credited to Building fund. Buildings Constructed by utilizing funds are Capitalized under Fixed Assets. The Depreciation attributable to buildings constructed out of such funds is charged against the Fund.

d) Fixed Assets

- i) All Fixed Assets are stated at cost less accumulated depreciation/amortization and impairment losses, if any. Cost of acquisition includes taxes, duties, freight and other incidental expenses relating to acquisition and installation.
- ii) Fixed Assets funded/purchased out of specific projects/grants, are capitalized at a nominal value of Rupee one.
- iii) Fixed Assets gifted to the Society are capitalized at a nominal value of Rupee one. The expenses in connection with the asset like registration, installation, improvements, etc., are also capitalized and depreciated in accordance with the accounting policy of the Society. The fair values of the assets gifted are disclosed by way of a note in the accounts.

e) Depreciation

Depreciation of fixed assets has been provided on written down value basis at the following rates:

NATURE OF ASSETS	PERCENTAGE
Office Equipment	25%
Medical Equipment	25%
Furniture & Fittings	15%
Electrical Installation	25%
Kitchen Equipment	25%
Vehicles	25%
Building	5%
Linen and Bedding	33.33%
Computer	60%

Depreciation on assets specifically funded is charged to the respective Fund account.

f) Income recognition**i) Grants and donations**

Donations are accounted for in the year of receipt. Government Grants are accounted for, on becoming due or on being sanctioned, whichever is earlier.

ii) Grants for specific/funded projects

Grants received for specific projects/ funded projects are credited to the respective project fund account. The direct expenditure incurred for carrying out these projects is charged to the fund account. Indirect expenses are allocated to the respective projects on the basis of the internal documents and project documents and credited to the respective expenditure in the Income and Expenditure Account.

iii) Interest

Interest on deposits/investments is accounted for on accrual basis.

iv) Billing to clients/inpatients

Billing to clients/inpatients is being accounted for on due basis.

g) Income tax

The Society is exempt from income tax under section 12AA of the Income tax Act, 1961 and hence no provision for taxation is considered necessary. Since the Society is exempt from income tax, no deferred tax asset/liability is required to be recognized in respect of timing differences.

- The value of fixed assets funded/purchased and charged off to the respective project accounts in earlier years have been capitalized at nominal value of Rupee one & credited to General Fund.

3. During the year ended 31st March 2018, a donor had donated land and building to the Society. The said land and building have been capitalized at a nominal value of Rupee one only. The expenses incurred for the registration of the gift have been capitalized. The fair value of the property on the date of gift as per the registered document is Rs.1,32,00,000/-.
4. During the year, the Society has constructed T.S. Santhanam Centre for Elderly Care (Dementia Care) by utilizing the Donations Received and Credited to the Building Fund. The depreciation for the year on the said building has been debited to the Building Fund.
5. Since the services of Students undergoing DNB course, were utilized for Residential Centre during the year, the stipend paid to them is accounted as an expenditure of Residential Centre.
6. Figures of previous year have been re-grouped wherever necessary

Signatures to Schedules forming part of Accounts.

2. 50% exemption under section 80G

STAFF OF SCARF

We have a good team of mental health professionals involved in the day to day functioning of SCARF. Although there is a small percentage of turn over, each year, the team is a highly spirited group. Working in the field of rehabilitation of chronic mental illness can be fraught with frustration at the slow progress made. A residential care facility position can be even more difficult with the multitude of administrative and clinical issues that crop up frequently. Yet, the staff is highly motivated to provide quality care to the patients seeking help at the centre.

The present team is as follows:

Vice Chairman

Dr. R.Thara

Director

Dr. R.Padmavati

Joint Director HR & Research

Mr. Sujit John
